DEVIATIONS FROM APPROVED PLANS/DESIGN

Describe any deviations from the approved plans/design of the on-site stormwater system, if any. n/a

ENGINEER'S CERTIFICATION

I, the undersigned, certify as a professional engineer that the stormwater system, including the ponds, was constructed substantially in accordance with the approved design on file with the Liberty Consolidated Planning Commission and that, despite any deviations noted above, the property, as developed, is in compliance with applicable Codes. I further certify that all stormwater designed to drain to the pond(s) does, in fact, do so and that the outflow from the pond(s) is equal to or less than the maximum outflow allowed by Code. I agree to provide calculations of the as-built storage volumes and/or outflow of the pond(s) upon request.
